---

Speidell Body Works switched to First American Payment Systems several years ago due to rising costs associated with our banks processor. Our overall costs including fees and interest dropped by at least 1.5% consistently. We have also been very satisfied with the personal service and the speed at which they get issues resolved with local representatives and not just an out of state (or country) call center.

I Highly recommend First American to anyone who feels they are paying too much for equipment and fees and not getting the personal service they deserve.
